RE: PRESERVE THE SAN JACINTO RIVER & FIX THE WASTE PITS

Dear Mr. Miller,

The remediation decision by the EPA about the San Jacinto River Waste Pits has been pushed back far too long. How much longer will you wait while the public health of the residents of East Harris County remains in jeopardy?

The time is now for a rapid, permanent solution. I support the permanent armored enclosure cited by the Army Corps of Engineers as the safest and quickest remediation option. I hope that you and your colleagues will prioritize myself and my neighbors in your decision instead of powerful companies. We are the ones living here, and our voices need to be heard!

Sincerely,

(b) (6)
